Map: 2010004 Selgise
Previous map [8006, Selgise](#)

Mappers: Kalle Kalm, Madis Oras, drawn in September, 2009 - April, 2010

Terrain:
Typical moraine terrain where medium sized and small hills and depressions are interlaced by marshes of different shapes and sizes. The terrain is very variable in regard to contour features and vegetation. Maximum height difference on the map is 35 m. Mainly mixed forest. Runnability is very varying. There is quite poor network of roads and paths, regular network of narrow rides. Paths and narrow rides are often overgrown and with fallen trees across them. Forest-covered areas make up 90% of the terrain. Water level in marshes is average. Snow was present in the terrain until the end of April. Growth of new leaves and grass are therefore hindered and it is expected, that greenery will not influence runnability dramatically during the competition.

Map scale for the long distance:
1:15 000 MW16E; MW18E; MW20E; MW21E;
1:10 000 MW14E;

Relay: 1:10 000 for all classes;
H – 5 metres

Maps in plastic bags, control descriptions on maps and additionally at start
